

## Hitachi Electronic Wallet with Modem Interface

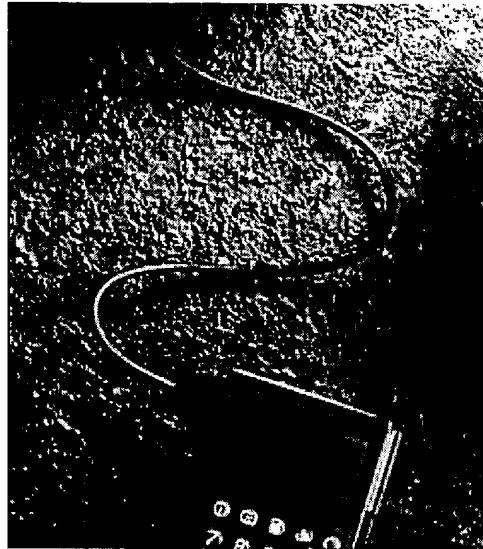

**HITACHI**

This Electronic Wallet with Modem Interface\*\* replaces the traditional wallet in the Mondex system. And offers the additional flexibility of transferring Mondex value quickly and easily anywhere in the world.

It lets cardholders store value in up to five different currencies, lock and unlock their card, change PIN numbers, and to read the balance and recent transaction information stored on the card's chip. Two reader slots enable exchange of value between card holders, making it perfect for personal and simple commercial transactions. Attaching a small external modem allows the Electronic Wallet with Modem to connect with banks and retailers, enabling electronic transfer of Mondex value.

The slim Electronic Wallet with Modem Interface slips easily into pocket or bag, for take anywhere convenience. The Electronic Wallet also functions as a watch, displaying the time in your international style of choice.

\*\* Modem supplied separately
